Security Statement

Your online security is very important to Lower Columbia Longshoremen's Federal Credit Union (LCLFCU). We are committed to protecting the security and confidentiality of your information. We use state-of-the-art technology and methods to help ensure that your online sessions are secure.

Internet Security Measures
Your information is scrambled. This technology, called Secure Socket Layers (SSL), protects information you submit or receive through this site. No representation is made, however, regarding the unconditional security of such submissions.

LCLFCU uses firewalls to stop entry by anyone without authorization. A firewall is a security mechanism that regulates the data going in and out of a network. It is a commonly used, specialized computer, which acts as a shield against data going in or out of a network. It performs a series of checks and balances to ensure that communications only occur between approved individuals.

Additionally, the security systems are constantly monitored to help ensure your information is secure.

For more information about online banking and security please visit our website www.lclfcu.org and click on the Privacy Statement link at the bottom of the home page.
